

Workforce behaviours in healthcare systems

Michalis Panayides

January 12, 2022

Contents

| | | |
|----------|--|----------|
| 1 | Introduction | 3 |
| 2 | Literature review | 3 |
| 2.1 | EMS/ED OR models | 3 |
| 2.2 | Game theory in Healthcare | 3 |
| 2.3 | Game theory and Queueing theory | 3 |
| 2.4 | Behavioural modelling | 3 |
| 3 | Queueing theoretic model | 3 |
| 3.1 | Markov chain | 3 |
| 3.1.1 | State mapping function | 3 |
| 3.1.2 | Steady state | 3 |
| 3.1.3 | Graph theoretic approach to steady state | 3 |
| 3.2 | Performance measures | 3 |
| 3.2.1 | Waiting time | 3 |
| 3.2.2 | Blocking time | 3 |
| 3.2.3 | Proportion of individuals within target | 3 |
| 4 | Game theoretic model | 3 |
| 4.1 | Formulation | 3 |
| 5 | Methodology | 3 |
| 5.1 | Backwards Induction | 3 |
| 5.2 | Nash equilibrium | 3 |
| 5.3 | Learning algorithms | 3 |
| 6 | EMS-ED application | 3 |
| 6.1 | Formulation | 3 |
| 6.2 | Numerical results | 3 |
| 7 | Agent-based extension | 3 |
| 7.1 | State-dependent model | 3 |
| 7.2 | Server-dependent model | 3 |
| 7.3 | Reinforcement learning | 3 |

| | | |
|----------|-------------------|----------|
| 8 | Results | 3 |
| 9 | Conclusion | 3 |
